ETHIRAJ COLLEGE FOR WOMEN (AUTONOMOUS) CHENNAI-600 008

DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

Revised syllabus for M.Phil 2018-2019

Department of Plant biology and Plant Biotechnology is revising syllabi with effect from the academic year 2018-2019 with CBCS components as specified by the Government of Tamil Nadu. Every academic year is divided into two semester sessions. Each semester will have a minimum of 90 working days and each day will have five working hours. Candidates are assessed based on components like internal assessments, assignments and seminars in each semester.

REGULATIONS

1. Eligibility for Admission

Candidates for admission to the M.Phil Course in Plant Biology and Plant Biotechnology course shall be required to have passed the Master of Science conducted by the Government of Tamil Nadu or an examination accepted as equivalent thereof by the Syndicate of the University of Madras.

2. Eligibility for the Award of Degree

A candidate shall be eligible for the award of the Degree only if she has undergone the prescribed course of study in a college affiliated to the University for a period of not less than two academic years, passed the examinations of all the four semesters prescribed.

3. Course of Study

A candidate should complete 2 semesters with a total credit 36 which includes course work and dissertations.

4. Passing Minimum

A candidate shall be declared to have passed in each paper of the course wherever prescribed, if she secured NOT LESS THAN 50% of the marks prescribed for the examination.

5. Classification of successful candidates

Successful candidates passing the examination & securing i) 60% and above and ii) 50% and above but below 60% in the aggregate shall be declared to have passed the examination in the FIRST and SECOND class respectively.

**ETHIRAJ COLLEGE FOR WOMEN (AUTONOMOUS) CHENNAI-600 008
DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY**

CHOICE BASED CREDIT SYSTEM OUTCOME BASED EDUCATION

**M.Phil. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY
(OFFERED FROM THE ACADEMIC YEAR 2018-2019)**

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

On obtaining a research degree the scholar will be able to:

PEO1 Demonstrate advanced domain knowledge competencies and display high order discerning and synthesizing capabilities to address local, regional and national concerns through innovative well researched solutions.

PEO2 Continue to serve the community of professionals and experts as both independent and team player with a strong grounding in ethics, inclusivity, gender parity and environmental sustainability.

**ETHIRAJ COLLEGE FOR WOMEN (AUTONOMOUS) CHENNAI-600 008
DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY**

CHOICE BASED CREDIT SYSTEM OUTCOME BASED EDUCATION

**M.Phil. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY
(OFFERED FROM THE ACADEMIC YEAR 2018-2019)**

PROGRAMME OUTCOMES (POs)

PO1 – Acquire in depth knowledge in their area of specialization and integrate into the research culture of the department.

PO2 – Gain expertise and confidence in handling of all analytical tools, interpretation of spectra to characterize materials by using software and theoretical knowledge.

PO3 – Recognize and integrate life-long learning skills to become pro-active in personal and professional life.

PO4 –Pursue Ph.D programme in their field of research and enhance leadership and teaching skills.

PO5- Apply the scientific knowledge to develop innovative ideas, products and methods for the benefit of biosphere at large.

**ETHIRAJ COLLEGE FOR WOMEN (AUTONOMOUS) CHENNAI-600 008
DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY**

CHOICE BASED CREDIT SYSTEM OUTCOME BASED EDUCATION

**M.Phil. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY
(OFFERED FROM THE ACADEMIC YEAR 2018-2019)**

PROGRAMME SPECIFIC OUTCOME (PSO)

After completion of the course the students will be enable to

1. Acquire contextual knowledge in the process of developing new products and gain expertise of well define area of research in Plant Biology and Plant Biotechnology.
2. Apply innovative methodologies to carry out independent research leading to pursue Ph.D programme and empower student's personal and professional development.
3. Analyse the impact of new emerging areas of Plant Biology and Plant Biotechnology in the industrial environmental and social contexts.
4. Employ the scientific skills and analyse data using appropriate statistical methods and tools to design and execute the research projects.
5. Promote leadership and teaching skills to evolve as excellent professionals in academic institutes and in public sector units-CSIR, DBT, DST, DRDO laboratories and to contribute towards the growth of the country.

DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

M.Phil PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

(from candidates admitted from 2018-2019 onwards)

PROGRAMME PROFILE

CORE 2	Advanced Plant Biotechnology	10M18/ADP

M.PHIL- PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMESTER 1

CORE PAPER I- RESEARCH METHODOLOGY

COURSE CODE: 10M18/REM

CREDIT-5

COURSE OBJECTIVES:

To enable the students to

- Understand the application of different types of microscopic techniques
- Gain knowledge in general laboratory techniques of Biochemistry and Microbiology.
- Provide insight in analytical separation techniques and their applications in Research.
- Apply the fundamental concept of immunology to understand immunotechniques.
- Impart the application of various statistical tools used in research and the significance of quality research publication.

UNIT 1 Microscopic technique:

Light microscope – Principle, construction and application –Dark field, Phase contrast, Fluorescence microscope, Polarization microscope and Confocal scanning microscope. Principle, construction, sample preparation and application of electron microscope – SEM , STEM, TEM.

UNIT II

General Lab Technique:

pH Buffering mechanism. Choice and preparation of common buffers – Potassium Phosphate buffer and Tris Acetate Buffer. pH measurements. Methods of sterilization of media and Glassware. Media – Choice of media, isolation, purification and maintenance of Algae, Fungi and Bacteria. Methods of Determining microbial number – Batch culture, continuous culture. Application of Fermenters.

UNIT III

Separation Technique:

Centrifugation:

Principle of sedimentation, Relative Centrifugal Force (G), Types and uses of Centrifuge – Bench top Centrifuge, Large capacity centrifuge, High Speed Refrigerated Centrifuge, Preparatory centrifuge and analytical centrifuge. Zonation and Isopycnic Centrifuge.

Chromatography- Principle, procedure, applications-TLC, Column chromatography, Ion exchange chromatography, HPLC, HPTLC, GC-MS.

Electrophoresis- General principle-factors affecting electrophoresis samples, principle, procedure and applications-Agarose gel, PAGE and SDS-PAGE.

UNIT IV

Immunotechnique:

Properties and type of Antibody and Antigen. Application and Production of Monoclonal antibodies and Polyclonal antibodies. Immunodiffusion, Immuno-electrophoresis, Immunolabelling – Biotin. ELISA.

UNIT V

Statistical methods:

Presentation of data-methods. Measurement of dispersion – range, variance, standard deviation, standard error. Test of significance based on large sample-small sample – Student t-test – ANOVA and DMRT. Probability – Probability distribution – Binomial, Poisson, and Normal. Simple correlation and Regression. Computer application - SPSS package. Designing the research work- components of a research report-thesis-plagiarism. Scientific writing – Manuscript preparation, citation style-citation index-H-index, impact factor.

M.PHIL- PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMESTER 1

CORE PAPER II- ADVANCED PLANT BIOTECHNOLOGY

COURSE CODE:10M18/ADP

CREDITS -5

Course Objectives

To enable the students to

1. Introduce students to the principles, practices and applications of different and applications of different culture techniques.
2. Get an advanced knowledge on techniques employed for isolation and characterization of biomolecules.
3. Explore the avenues in genetic engineering and prospects in recombinant DNA technology.
4. Gain knowledge on the use of molecular and bioinformatics tools for sequencing of genes and proteins.

Unit I

Microbial and Cell Fraction Technique:

Cell and Tissue culture-Microbial culture, plant cell and tissue culture, cell sorting , culture collection, cryopreservation. Cell fraction-Solid shearing, liquid shearing, high pressure extrusion, ultrasonic oscillation, use of proper osmoticum and antioxidants. French press. Isolation of mitochondria, chloroplast and nucleic acid.

Unit II:

Phytochemical Techniques:

Solvent Extraction- Maceration, Percolation, Cold Percolation, Steam distillation, Extraction of Essential Oils, Soxhlet Extractor.

Isolation of compounds – Quantitative estimation of the isolated compound- Characterisation and Identification.

Unit III

Tools And Techniques:

Basic principle and biological applications - UV, FTIR, Mass spectroscopy and NMR. Cytophotometry – Flow Cytometry. Nanoparticles – Green Synthesis- Characterization –SEM,TEM, EDX,XRD.

Unit IV

Genetic Engineering:

Principles and Method-Southern Blotting,Northern Blotting,Western Blotting,Dot and Slot Blot. Enzymes used in genetic manipulation-Restriction endonucleases and Ligases. Gene transfer technique-Microinjection, biolistic gun, electroporation -principles and applications.

Unit V :

rDNA technology: Cloning vectors-Viral DNA, plasmid DNA, cosmids. Molecular marking system for microbes (Lac-Z and GUS), vectors of eukaryotes and their uses in transfer of DNA.DNA sequencing-Maxam and Gilbert method and Dideoxy method. Molecular probes, DNA fingerprinting, DNA microarray. Bioinformatics-sequence analysis and alignment, protein sequencing. Drug discovery-procedure and applications.

Radiolabelling techniques-Half life, types of radiation decay, measurement of radioactivity. Incorporation of radio isotopes in biological tissues and cells. Radio Immuno Assay . Safety guidelines.

ELECTIVE 3	Plant Pathology	10M18/PLP
	Dissertation	10M18/DSN

M.Phil - DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMESTER II

ELECTIVE - GENETICS

COURSE CODE: 10M18/GES

CREDITS: 5

Course Objectives:

To enable students to

- Learn the concepts of cytogenetics and molecular genetics
- Understand the basics of genetics in prokaryotes
- Acquire knowledge in developmental genetics and sex determination
- Gain knowledge in radiation genetics and on the impact of environmental toxicants on genes
- Learn the molecular mechanism and application of mutagenesis

UNIT I

Cytogenetics: Chromatin and organization of chromosomes. Relation between structure and function of chromatin. Karyotype, Idiogram, Banding methods – Q,G,C,R,N banding.HRT technique. Origin and significance of chromosomal aberrations. Physical, Chemical mutagens and chromosomal damage Structural chromosomal changes.

Molecular Genetics: Introduction – Evidences for DNA as genetic material – Mechanism of DNA replication – The topological problem. Molecular events in transcription- Inhibition of Transcription, RNA-structure and types. Mechanism of Protein synthesis – Inhibition of protein synthesis. Extra Chromosomal protein synthesis.

UNIT II:

Prokaryotic Genetics: Plasmids – Properties and Classification, conjunctive plasmids – Resistance factors - Significance of plasmids. Bacteriophage – properties, Phage mutants, Genetic maps, Phage life cycle, Molecular and enzymatic mechanism. Principles of genetic engineering and gene cloning.

UNIT III:

Eukaryotic Genetics: Alleles – Ultra structure, allelic sites, complementation test, Multiple alleles. Multiple genes– Nature, Mechanism, Quantitative inheritance, Polygene concept. Developmental genetics - Mutation affecting early development, Birth defects due to abnormal Karyotyping - Sex differentiation, Developmental Sex abnormalities – hormones in Development.

UNIT IV:

Genes And Environment: Introduction – Environmental toxicants – Chemical and physical mutagens, carcinogens, Teratogens and their relationship.

Radiation Genetics: Measurements of Radiation – its effect on cells. Cell kinetics and radiation response. Radiation pathology. Radiation alternations – Radiation protection – Clinical applications.

UNIT V:

Molecular mechanism of physical and chemical mutagenesis. Repair system. Test system in screening mutagenesis. Application of mutagenesis in screening environmental toxicants. Plant alkaloids as chemical mutagens.

SEMESTER II

ELECTIVE –HERBAL BOTANY

COURSE CODE: 10M18/HEB

CREDITS:5

Course objectives

To enable the students to

- Explore the significance of plant drugs in human welfare.
- Understand the various techniques applied in the production of plant drugs.
- Impart knowledge in classifying plant drugs based on different sources and their medicinal properties
- Apply the fundamental techniques used in identification and characterization of plant drugs.
- Understand the conservation strategies adapted for the existing and endangered medicinal plants.

UNIT I:

Introduction, impact of plant drugs in human welfare. Regional studies, Recent trends and Socio – economic aspects.

UNIT II:

Principles of collection, preparation/processing and storage of plant drugs. Methods of classification of plant drugs. Factors influencing the quality and variability of plant drugs such as geographical factors, climatic factors, soil and nutrients, genetic factors and biotechnology.

UNIT III:

Classification of plant drugs based on the source – Entire Plant, Root , Stem, Bark, Leaf, Flower, Fruit and Seed. Study of medicinal properties and uses with reference to the above.

UNIT IV:

Identification of Plant Drugs – Acid, Alcohol, Ester, Carbohydrates, Phenolic compounds, Volatile oils, Resins, Saponins, Flavonoids, Alkaloids, Vitamins, Hormones and Antibiotics - Extraction, Isolation and Characterization.

UNIT V:

Conservation- existing and endangered medicinal plants- conservation strategies.

SEMISTER II

ELECTIVE – PLANT PATHOLOGY

COURSE CODE: 10M18/PLP

CREDITS: 5

Course Objective:

To enable the students to

- Understand the major principles of plant pathology.
- Recognize the etiology of the disease.
- Understand the mechanism of pathogenesis and host-pathogen interaction.
- Learn the techniques involved and in detection of pathogen and disease forecast.
- Gain knowledge on disease management strategies.

UNIT I:

History and principles of plant pathology. Study of plant infection-penetration and colonisation, host –pathogen interaction.

Role of enzymes and toxins in pathogenesis. Symptomatology and dissemination of pathogen.

UNIT II:

Pathological physiology of diseased plants – plant water relations, Photosynthesis, Respiration and Growth.

UNIT III:

Defense mechanisms – Structural and Biochemical Genetics of plant diseases. Molecular basis of disease resistance. Molecular tools for detection of plant pathogens.

UNIT IV:

Plant diseases Epidemiology, Modern methods of Disease forecast. Epiphytotic –Causes and decline. Plant Protection – Cultural, Physical, Chemical, Biological. Genetical Breeding and Hybridization. Immunization.

UNIT V:

Common diseases of crop plants with special reference to South India. – Causal Organism, Symptoms and Disease management.

Course outcomes

After completion of the course students will be able to

CO No.	CO statement	Knowledge Level
CO1	Apply the principles of plant pathology in understanding host-parasite interaction	K3
CO2	Analyse the pathological physiology of disease plants.	K3, K4
CO3	Identify the defense mechanism in plant diseases and to detect pathogen using molecular tools.	K4 & K5
CO4	Formulate disease forecasting and plant protection methods for control of plant diseases.	K5 & K6
CO5	Identify plant diseases and use appropriate strategies for disease management.	K5 & K6

Mapping of CO with PSO

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5
CO1	3	3	3	3	3
CO2	3	3	3	3	3
CO3	3	3	3	3	3
CO4	3	3	3	3	3
CO5	3	3	3	3	3
Average	3	3	3	3	3

ETHIRAJ COLLEGE FOR WOMEN (AUTONOMOUS) CHENNAI – 600 008
(For the candidates admitted during the year 2018-2019 onwards)

M.Phil DEGREE EXAMINATION

Draw diagrams wherever necessary

QUESTION PAPER PATTERN-M.Phil

Knowledge Level	Section	Word Limit	Marks	Total
K4/K5/K6	5/8 x 20	1200	100	100
